### **DETAILED ACTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, 22-28, 32-40, drawn to a router re-establishing a communication session upon a failure of its primary controller, classified in class 370, subclass 217.
- II. Claims 10-21, 42-54, drawn to establishing a communication session with a routing protocol, classified in class 370, subclass 465.
- III. Claims 29-31, 41, drawn to communicating restart information and restart time periods between a first router and a second router, classified in class 370, subclass 503.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions I, II and III require different searches.
